

The population of any country dreams of being happy.

Fortunately, there are many components that differ from person to person, but it is not possible without health. Being healthy is one of the main wishes of a person. "Health is not" everything ", but" everything "is nothing without health" - Socrates
Health is subject to the general laws of the universe and only when a person violates these laws comes the disease.

Generations of people who remember the Chernobyl disaster are still alive. This year marks 35 years since this event. No one wants to experience that horror a second time. But the echoes of disaster are still heard. Polluted forests, rivers, land, damaged human destinies, health - all this remains in Ukraine and abroad. The Chernobyl catastrophe certainly contributed to the deterioration of the environment. And environmental factors are known to significantly affect the deterioration of the health of present and future generations.

The state policy of Ukraine in the field of health care is aimed at improving the level of health, improving the quality of life and provides for the reorganization of the health care system, according to which the main part of medical services should be provided at the primary level, with widespread introduction of preventive technologies.

Knowledge of hygiene is necessary for effective preventive activities to protect and improve the environment, to improve the sanitary condition of cities and villages, residents, working conditions, recreation and treatment, education of children and adolescents, to streamline nutrition. All this will make the development of the human body more complete, life the strongest, aging the slowest, and death the most remote.

The pace of social, economic, climate change requires a person to adapt quickly. Decreased functional reserves of both individual organs and systems and the body as a whole, violation of self-regulation, reduction in the number and deterioration of the quality of future generations - the hallmarks that distinguish us from our predecessors.

In this regard, it is important to study the conditions and methods of maintaining health, prevention of diseases and premorbid conditions, understanding the role of social and natural environment in the life of healthy and sick people.

An important role in maintaining human health and all living things on Earth belongs to the environment and hygiene.

The conference "Ecological - hygienic aspects of public health and biosafety" aims to unite like-minded people from around the world, provide students with knowledge about the impact of natural and social living conditions on human health, identify current environmental issues and understand the relationship between possible negative environmental influences on the occurrence of diseases. Identification of measures by which the optimization of the surrounding environment is achieved.

MAEM

Private higher education institution

"International Academy of Ecology and Medicine"

invites scientists, doctors, graduate students, doctoral students Universities, scientific organizations and institutions take part in the Ukrainian Scientific and Practical Conference with international participation

"ENVIRONMENTAL AND HYGIENIC ASPECTS OF HEALTH AND BIOSAFETY OF THE POPULATION" which will be held on April 07-08, 2021 on the basis of the International Academy of Ecology and Medicine (Kiev), online, depending of the epidemiological situation.

The platform of the event, as well as, if possible, a change in the format, will be announced additionally.

Conference sections:

Section 1. Consequences of the impact of the Chernobyl accident on human health - 35 years in a row.

Section 2. Hygienic problems of Ukraine and ways to solve them in terms of European integration.

Section 3. Biosafety of the population: today's challenges and modern aspects of the solution.

The sections will address issues related to the analysis of the long-term impact of the Chernobyl accident on public health, as well as the problems of population hygiene and biosafety in the context of current challenges.

Working languages: Ukrainian, English, Russian

Address of the conference organizing committee

International Academy of Ecology and Medicine

Kharkivske Shosse, 121, Kyiv, 03058

Phone numbers of the secretariat:

+38 (044) 576-06-00,

List of documents provided for participation in the conference and publication in the collection of abstracts

(all documents are sent by e-mail)

1. Registration card of the conference participant (Word file format).

2. Abstracts of the report (Word file format), with obligatory indication of the UDC number.

3. Receipt of payment of registration fee (scanned or photo).
Registration cards and materials of participants are sent by e-mail to the conference organizing committee Tetiana.med.2020@gmail.com.

The Organizing Committee reserves the right to refuse to publish abstracts in case of their inconsistency with the

theme of the conference or the specified design requirements and in the absence of scientific and / or practical value in the work. After sending the abstracts of the report, you should wait for an e-mail confirming their acceptance and then pay the registration fee.

Terms of participation in the conference, an example of abstracts and news, see the website

<http://maem.kiev.ua/nakovi-konferentsii/>

Publications and internship programs

Based on the results of the conference, a collection of abstracts will be published (in electronic and printed versions).

Conference participants will have the opportunity to place articles on the materials of reports in the journals: International Journal of Healthcare Management (Scopus), Scientific Journal - Materials and Technology (Scopus).

Thanks to the participation of co-organizers of the conference and our foreign partners, we have the opportunity to invite conference participants to join the programs of international scientific and scientific-pedagogical ONLINE INTERNSHIP, organized by INTERNATIONAL ACADEMY SPEKTR, SLOVENIA, 180 h / 6 ECTS, together with leading Slovenian research institutes and medical centers.

Upon completion of the internship, a CERTIFICATE of the European standard is sent. The participants of the internship will have the opportunity to visit scientific institutions and medical and thermal centers in SLOVENIA on preferential terms.

The cost of the internship depends on the direction and range of services provided.

Program option: Impact of environmental factors on public health. Innovative programs developed in Slovenian resorts - "Metabolic Syndrome", "Detox", "Slimfit".

Individual internship topics are possible.

PARTICIPANT REGISTRATION FORM

Surname		
Name		
Status		
Name of institution / educational institution		
Position (for students - course)		
Phone		
E-mail		
Address of institution		
scientific adviser		
Phone		
E-mail		
Co-authors		Name of institution / educational institution
Title of the report		
Conference section		
Purpose of participation in the conference: (underline the necessary)	→ presentation of a report with publication in the conference proceedings; → only publication in the conference proceedings	
Do you need an official invitation?	Yes (position and name of the person to be invited by official letter)	No

The author, sending the Registration Card and abstracts of the report to the Conference Organizing Committee, gives the Organizing Committee the following rights for the entire term of the exclusive rights to the abstracts of the report:

- The right to reproduce the abstracts of the report without limiting the circulation of copies (each copy contains the name of the author of the abstracts of the report);
- The right to disseminate abstracts of the report in any way;
- The right to be included in the composed work;
- The right to be made public;
- The right to use metadata (name, name of the author (copyright holder), bibliographic materials, etc.) of the report by disseminating and bringing to public knowledge, processing and systematization.

Requirements for abstracts:

When preparing abstracts, it is recommended to use the example of abstracts, which is posted on the website <http://maem.kiev.ua/nakovi-konferentsii/>

Sheet format: A5 (148 × 210 mm). Margins: top - 30 mm; right, bottom - 20 mm; left - 15mm. Line spacing is single. Text part: Times New Roman, 9 point; indentation of the first line of the paragraph 0.55 cm; width alignment, without hyphenation. Drawings (presented in black and white image): the thickness of the lines of drawings and diagrams - not less than 0.5 pt and not more than 1 pt.; inscriptions on the figure and the signature under the figure - 8 point. Tables: Table 1 - 9 point italics, on the right side; deviation from the name up and down - 4 pt. Formulas: Latin letters - italics, Greek, Ukrainian, Russian - direct; regular symbol - 9 pt, large index - 6 pt, small index - 5 pt, large symbol - 9 pt, small symbol - 6 pt.

ATTENTION! When formatting text, do not compress the font to reduce its size or indent it with spaces.

To avoid spelling mistakes, you should check the text of these using the "Spelling" function.

The list of used literature is made out according to DSTU GOST 7.1: 2006 "System of standards on information, library and publishing business. Bibliographic record. Bibliographic description. General requirements and rules of drawing up".

Text size: 1-2 (necessarily full) pages (including figures and tables). There is a space between the initials of the authors and the supervisor. If the authors and the supervisor have a scientific degree and academic title, they are indicated abbreviated (for example, professor - professor, associate professor - associate professor, doctor of technical sciences - doctor of technical sciences, candidate of biological sciences - Ph.D.). In the absence of a scientific degree, the status is indicated - graduate student, young scientist, student.

Publication structure: 1. Surname and initials of the authors, academic degree, position, institution, city - in the original language and in English. 2. Address of the institution. 3. Title of the article in the original language and in English. 4. Abstract in English (100-150 words). 5. Keywords in English (5 - 7 words or phrases). 6. The main text of the article (be sure to highlight: introduction, purpose, research methods, results, conclusions). 7. References.
